- FRENCH B
- ARABIC C

ABOUT ME

junior full-stack JavaScript developer specializing in responsive web applications using React, React Native, and Node.js. I have expertise in MySQL for database management and proficiency with ORMs like Sequelize. I am passionate about learning new technologies and driving innovation in my projects, motivated by a desire to continually evolve and improve.

PROJECTS

DiscoveryTN (React Native)

2024

- Implemented JWT for authentication and authorization to ensure secure access.
- Optimized app performance using Expo and Tailwind CSS.
- Utilized Cloudinary for efficient image storage.
- Ensured robust data security with bcrypt and Sequelize for database management.
- Integrated Nodemailer for seamless communication capabilities.
- Employed Weather and Location APIs to enhance application functionality.

E-shop (React)

2024

- Led a team as SCRUM Master for an e-shop website project using React Native.
- Implemented JSON Web Tokens (JWT) for secure authentication.
- Developed an admin dashboard for efficient management and oversight.
- Managed image storage and processing with Cloudinary.

Cinematrix (React)

2024

- Implemented JWT for secure authentication.
- Utilized Cloudinary for image storage.
- Designed an intuitive admin dashboard.
